Get Comfortable Saving Energy

Since programming is a breeze, you'll really appreciate energy saving features like adjustable minimum and maximum temperature controls and Energy Efficient Recovery™. By using the programming features of your insight thermostat, you can control your comfort and reduce energy costs up to 25%.

- **insight Speaks** your language—English, Spanish or French
- **Menu Scroll Buttons** mirror a common cell phone or ATM
- **3 Hold Settings** to choose from—permanent, temporary or vacation override
- **Conversational Menus** take you step by step through the programming process
- **Sleek, Compact Design** complements your home interior

Added Features

NiteView™ Back Lit Display lights up when any button is pressed.

Fully Programmable with 7 day, 5 / 2, 5 / 1 / 1 or 24 hour programming menus.

Adjustable Events Per Day allow you to program 2, 4 or 6 events per day to really fine tune your comfort.

EER™ (Energy Efficient Recovery) saves energy by allowing gradual recovery from setback temperatures to minimize the use of auxiliary systems.

Auto Changeover automatically switches between heat and cool mode so you don't have to.

Worry-Free Memory Storage maintains all thermostat settings—even during a power outage.

3 Levels of Security prevent unwanted changes to programming menus, temperature and set-up functions.

Programmable Fan allows you to custom set air circulation for maximum comfort.

Intermittent Fan provides minimum hourly air circulation rates for optimal filtration and minimal energy use.

Remote Indoor Sensor helps monitor and control the temperature indoors.

Remote Outdoor Sensor monitors outdoor temperature conditions.

ENERGY STAR® qualified thermostat for energy efficiency.

ENERGY STAR® is the official trademark of the US Environmental Protection Agency. As an ENERGY STAR® partner, Invensys has determined that these products meet the ENERGY STAR® guidelines for energy efficiency.
